Re: Randy Epperley
Supervisor of our home
Elevation on Somerset
Marrero, Louisiana 70072

To Whom It May Concern:

We, Joseph and La Verne Francois would like to give our testimony on the home elevation job Robert Wolfe Construction was hired to perform. In February 2013 our previous contractor in Marrero, abandoned our home elevation project. The Marrero Contractor abandoned our home elevation, after he trenched around our house. We had a trench that was full of rain water almost all the time for five months. The trench also became full of tadpoles and other aquatic life. This situation became hazardous, stressful, and it was an eye sore in the community. Robert Wolfe Construction was hired in June 2013 to restart and complete our abandoned home elevation project.

Robert Wolfe Construction, assigned Randy Epperley as the supervisor for our home elevation, and they started quickly working on our house in late June 2013. My wife and I were so happy to have the work started on our house again. Randy did a great job of keeping us informed, about each phase of our home elevation process. Randy was dedicated to the timely, safely, professionally, and attractive completion of our home elevation. My wife and I wanted Randy to be acknowledged, thanked, and recommended for a job that exceeded our expectations. The elevation of our house was completed in August 2013.

We highly recommend Robert Wolfe Construction for your home elevation. They were responsible for taking our horrible prior home elevation situation, and creating a home elevation, that we are very thankful for. Amen, Amen!

Sincerely,

A handwritten signature in black ink that reads "Joseph & LaVerne Francois". The signature is written in a cursive, flowing style.
